

Monitoring System

Temperature Controller

PRIME: NEW MAIN FEATURES

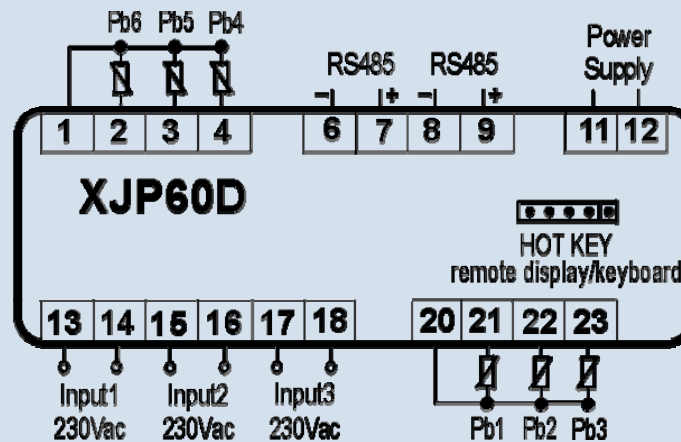

- TTL serial connection for monitoring systems
- Connection for X- REP
- Digital input configurable as probe (option)
- Condenser alarm via third probe
- Continuous cycle with dedicated set (fast cooling applications)
- Stop cooling via second probe (beer dispenser applications)
- Fan thermostat during defrost
- 2° stop defrost probe or dual evaporator management
- Virtual probe for air in/out application (percentage control)
- Double thermostat function (two set points and two probes) heating and cooling or 2 cooling or 2 heating or neutral zone
- Energy saving
- Dynamic set point – supermarket app

Temperature Modules

XJP60D

- 6*NTC or PTC (4-20mA - 0-10V) probe inputs
- 3 digital input
- X-REP / HOT KEY connection
- 230V power supply; build-in RS485

XWEB500

New controlling and monitoring unit

- A brand new monitoring and controlling unit
- Extended memory up to 128MB
- Internet / Intranet connectivity
- Advanced functions :
Scheduler, Layout and Run Time

Features

- **Clearly readable dark-blue display (4x20), 8 keys keyboard and 8 signaling LEDs.**
- **Possible to view the current alarm list.**
- **Possible to load a controller and manage it.**
- **Can be sat on a desk top or mounted vertically, either surface mounted or recessed into an electrical panel.**

Features

- 110, 230Vac power supply
- Dimensions: 230x210x87mm
- Peak power consumption: 20W
- 200MHz CPU
- RAM memory: 32MB
- Flash memory capacity: 128MB
- Connect up to 100 controllers
- 3 output relays
- ModBUS-RTU compatible
- On-board modem (optional)
- Ethernet RJ45 port for LAN & internet connection
- USB cable connection to PC
- USB support for external devices
- COM port for external modem
- GSM Modem support

Remote connection

Intranet/Internet Connection

...Run Time

Run Time function allows to display in the same window multiple controllers simultaneously. The page is dynamic and the information are updated in real time.

The screenshot displays the XWEB Run Time monitoring interface in a Mozilla Firefox browser window. The address bar shows the URL `http://192.168.0.224 - RunTime - Mozilla Firefox`. The interface features a navigation bar with the XWEB logo and a 'Select' dropdown menu currently set to 'cabinet'. Below this, a list of seven cabinet controllers is displayed, each with its own set of monitoring data and control icons.

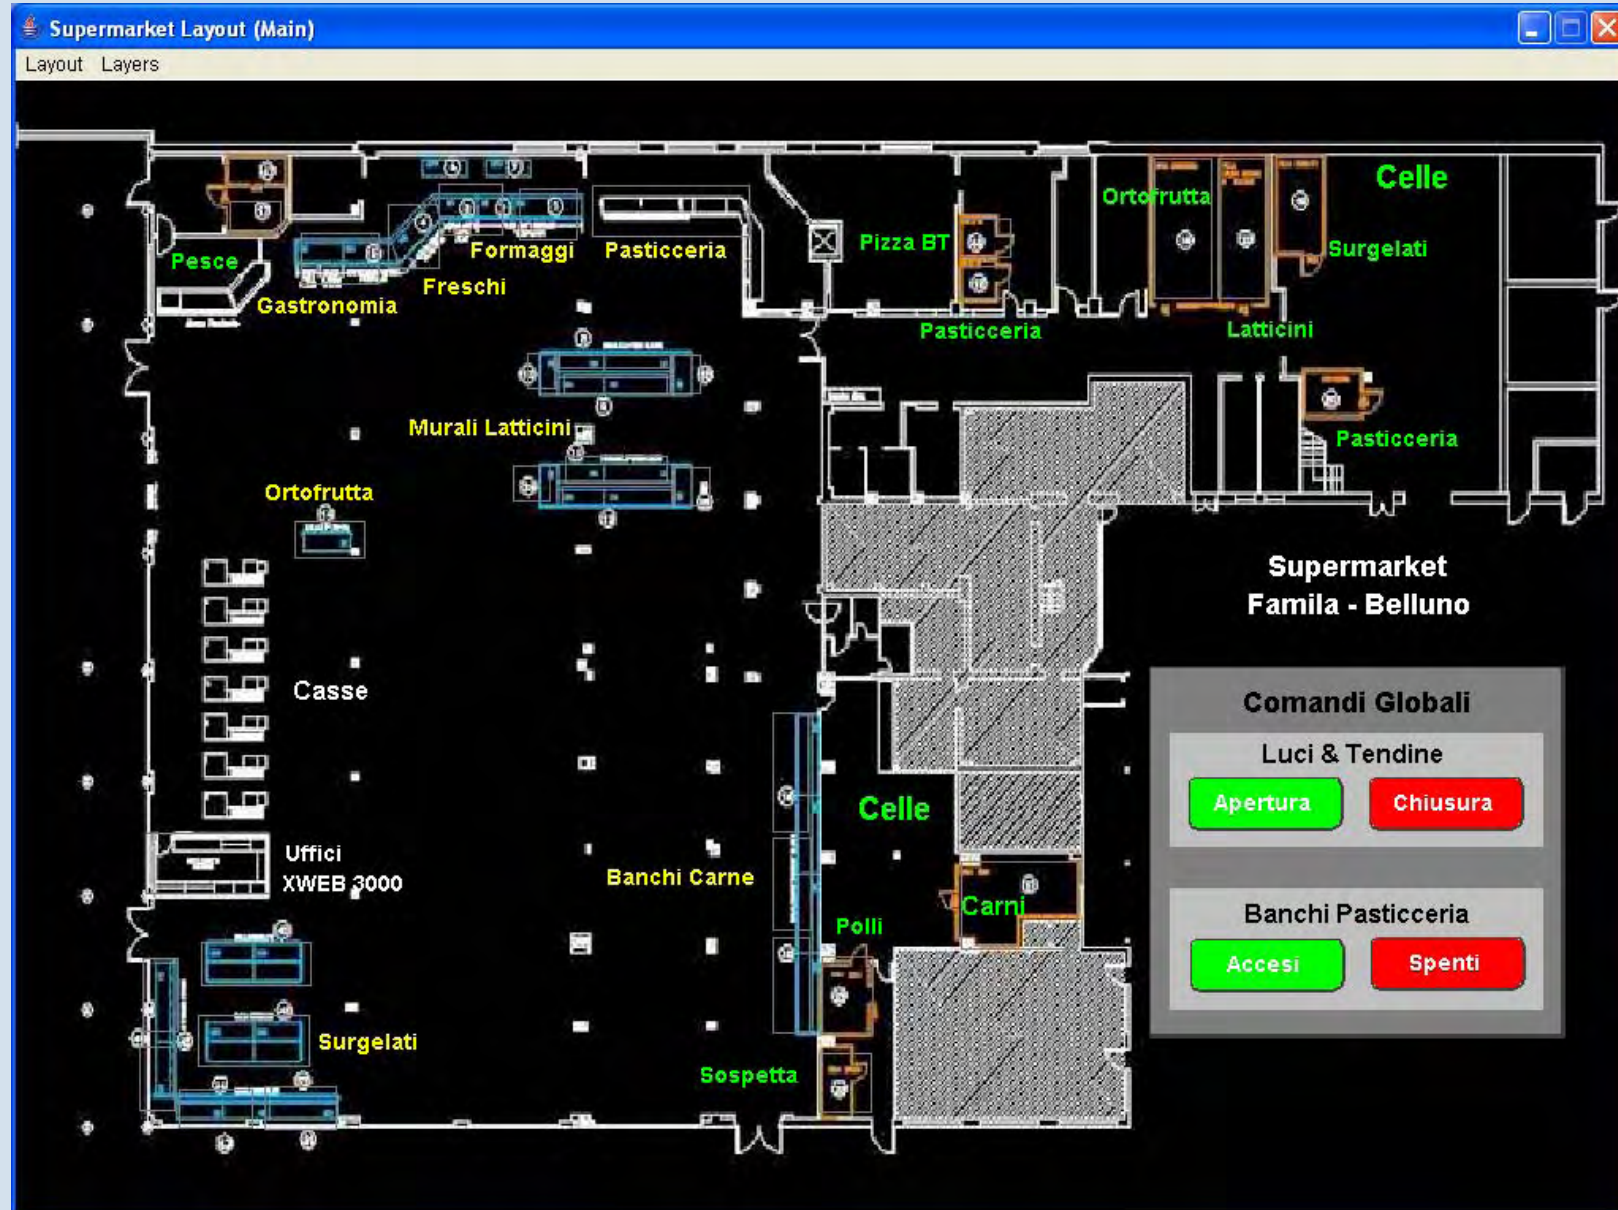

ID	Name	Typ	Room Temperature	Evaporator	Set Point	Door switch	Generic Alarm
010	Fish cabinet LT	Celle	-19.2 °C	-25.3 °C	-20.0 °C
